## **DETAILED ACTION**

This office action is in response to the amendment of June 23, 2008. In making the below rejections the examiner has considered and addressed each of the applicant's arguments.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 recites the limitation "said electrical-opening means" in lines 1 and 2.

There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3746

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 4, 5, 9, 21 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaplan et al for the reasons set forth in the rejection of claims 1-9, 11, 21 and 22 in the first office action.

### ***Response to Arguments***

Applicant's arguments filed June 23, 2008 have been fully considered but they are not persuasive. The applicant argues that Kaplan does not disclose a capacitor arrangement and notes that claim 1 has been amended to set forth a dielectric diaphragm arranged between a first electrode and a second electrode to form a capacitor.

The examiner notes that the phrase "to form a capacitor" is a statement of a desired result. A capacitor is a dielectric having a metal plate on each side. The dielectric diaphragm with the electrode on each side of Kaplan et al does therefore form a capacitor, whether it is used this way or not. The examiner notes that if the claim were amended to positively set forth a capacitor including the diaphragm and electrodes then it would define over the Kaplan et al reference.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3746

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
